### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brigitte A. Hajos on 07/28/2004.

The application has been amended as follows:

Claim 1 (current amended):

In line 5 deleted "filtering" and inserted --- diafiltering ---

In line 3 before "cell culture supernatant" inserted --- concentrated ---

In line 6 deleted "and isolating said purified preparation of complete HAV particles, wherein said purified preparation of complete HAV particles has less than about 30 pg contaminating nucleic acid/IU HAV antigen " and inserted --- which results in the said purified HAV particles having less than about 30 pg of contaminating nucleic acid/UI HAV antigen ---

Canceled claim 2.

Claims 1, 4, 7, 8, 10 and 13-14 are allowed.

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to an unexpected result of using a diafiltration in a single step to finally purify the complete HAV particles after the nuclease and proteinase digestions, which unexpectedly results in a high purified preparation of complete HAV particles with less than about 30 pg contaminating nucleic acid/IU HAV antigen. The close art of removing the contaminating enzymes by gel filtration (chromatography) as evidenced by Beth et al. (EP 0,583,142A2) usually requires several steps or more than one chromatography columns plus dialyzation and concentration. Applicants found that such complicated steps can be perfectly done by a single step of diafiltration after the enzymes treatments (See paragraph 043-049, 080-081). This is a good discovery for a method of purifying complete HAV particles by simplifying many

complicated steps into an easy single step with a high purity and high quality of the purified product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Qun Li whose telephone number is 571-272-0904. The examiner can normally be reached on 7:00 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on 571-272-0902. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
